

Keerthivasan v

Web Full Stack Developer

93604-10038	keerthivasanvbe@gmail.com	Tamil Nadu, India
-------------	---------------------------	-------------------

Objective

Web Developer with 3 years of experience in React.js, JavaScript, responsive UI development, and API integration. Skilled in building clean and user-friendly interfaces, improving performance, and developing scalable web applications. Strong understanding of UI/UX design, front-end frameworks, and modern development practices.

Dynamic Software Engineer and Web Developer with a strong foundation in coding, problem-solving, and innovative design. Proficient in multiple programming languages and frameworks, I am passionate about creating efficient, user-friendly applications. Eager to contribute my skills to a forward-thinking team, I thrive in collaborative environments and am committed to delivering high-quality solutions that drive success and enhance user experience.

Education

NSN College Of Engineering And Technology - Karur

B.E(EEE)

CGPA: 8.0

Key Skills

HTML 5
Bootstrap
JavaScript(ES-6)
Responsive web Design
FIGMA
K6 SOFTWARE(Load Testing)
POSTMAN(API Testing)
SQL
Node.js Expertise
Problem-Solving
UI/UX Design

CSS
Tailwind CSS
React JS
Browser Developer Tools
JIRA (Project Management Tools)
JEST (Unit Testing)
RESTful APIs
Mongo DB
Database Design
Database Management
Team Collaboration

Experience

Web Developer | EASA College of Engineering and Technology | Jan 2026 – Present | Coimbatore

- SEO & Traffic: Boosted organic traffic by 60% and user engagement by 100% through responsive design and semantic SEO.
- Performance: Slashed page load times by 70% via image optimization and code-splitting, ensuring a frictionless UX.
- Integration & QA: Integrated REST APIs and enforced rigorous debugging, maintaining 99.9% site reliability.

Software Engineer | Prudent Gaming India | Jul 2023 – Oct 2025 | Bangalore

- Built responsive web apps using React.js and cross-platform mobile apps using Flutter (Android/iOS).
- Seamlessly integrated backend APIs, enhancing real-time data sync and user interactivity.
- Collaborated in Agile sprints with cross-functional teams, ensuring 100% on-time project delivery.

PROJECT

Travel Booking And Brand site - HTML | CSS | Java Script | Figma

- Designed and developed a fully responsive travel website using HTML, CSS, and JavaScript, with interactive features like image sliders, dynamic content, and client-side validation to enhance user engagement across devices.
 - Created UI/UX prototypes in Figma to define user flows and visual design, ensuring a smooth and user-friendly browsing experience.
 - **Live Project** : <https://keerthivasanv01.github.io/travel-website>
-

Hospital website with CMS - React JS | Mongo DB | Restful API | Figma | Golang

- Developed a live hospital management system using React.js and Strapi CMS, featuring appointment booking, admin panel, authentication, and full API integration for real-time data and content management.
 - Designed a fully responsive, animation-enhanced UI with optimized performance, smooth user experience, and secure data flow connected to a Strapi-powered backend and database.
 - **Live Project** : <https://lucknowheritagehospital.com>
-

EASA College website with CMS - React JS | Mongo DB | Restful API | Figma | Node JS

- Architected a Full-Featured CMS & Admin Dashboard – Designed and deployed a secure, role-based admin panel empowering non-technical staff to autonomously perform CRUD operations for admission inquiries, syllabus updates, academic session management, and career page content—completely eliminating developer dependency for daily content changes.
 - Streamlined Institutional Workflows – Automated data synchronization across the dashboard, reducing manual content update time by 60% and enabling real-time visibility of admission status and curriculum changes for students, faculty, and administrative stakeholders.
 - Engineered a High-Performance Frontend – Built a mobile-first, responsive website integrated with the CMS, implementing advanced caching and optimized database queries—resulting in a 70% reduction in load times, 100% boost in user engagement, and a 60% surge in organic traffic through SEO-friendly content structures.

 - **Live Project** : <https://ecetonline.com>
-

Corelix Technology Enterprise CMS & Admin Panel - React JS | Node.js | Express | JWT

- Took End-to-End Ownership – Solely architected, developed, and deployed a fully functional Admin Dashboard and CMS from scratch for a live IT company, giving their non-technical team complete control over website content, user roles, and admissions data without relying on developers.
- Built Secure, Production-Grade APIs – Designed and integrated robust RESTful APIs with JWT-based authentication and role-based access control (RBAC), ensuring secure CRUD operations for managing pages, career listings, and dynamic system configurations.
- Delivered Measurable Business Impact – Streamlined their internal content workflow, slashing content update turnaround time by 40% and completely eliminating the company's dependency on coding support for daily operational changes like syllabus updates and admission inquiries.
